

Biomethane enables swift decarbonisation

of industrial and transport sectors and its price can vary based on the relevant policy and regulation, as well as on the offtake segment

There is additional 30 bcm capacity required to reach 2030 target in the European Union, with about +5 bcm expected to be installed in Italy by the same year

By monitoring market, policy, and regulatory developments, project sponsors and investors can make informed decisions about the plant portfolio and negotiate competitive contract terms
