

CUBOGAS

Compressors for Biomethane

cuboGas

July, 2025

Cubogas is an international leader in compression solutions, within Snam group

Snam, leading infrastructure operator in Europe, supports the development of new businesses fully dedicated to energy transition...

- Target of **+160 L-CNG refueling stations by 2027** (70 already operative)
- Award of **PNRR tender (15M€)** to build **#8 H2 refuelling stations**
- Ambition to handle **400+ kton LNG by 2026 in Midstream LNG sector**

...and is strongly committed to H2 economy development

Set up of **domestic ecosystem**

cuboGas

Production of **equipment**

Hyaccelerator
powered by Snaminnova

R&D of **innovative technologies**

cuboGas

Cubogas S.r.l., Greenture subsidiary based in **Cherasco** (Piemonte), is a global leader in design, development and production of **technological compression solutions** for natural gas, biomethane and hydrogen

90+ years of experience in the field, with **4.000+ units installed** worldwide

International business with more than **80%** of sales abroad and 40+ countries served

Natural gas applications on several industries ranging from mobility, to biomethane and gas recovery / drainage

Strong focus on H2 development and, potentially, other gases (e.g. CO2)

Cubogas products offer several important advantages that impact not only **product reliability** but also **Total Cost of Ownership**, such as:

- Low rotational speed → **lower wear** of components and longer maintenance intervals
- Non-lubricated cylinders → very **limited oil contamination**
- Best in class **Energy consumption**
- **Designed custom** according to your specifications
- Best in class **Remote control system** → for self-diagnosis, failure prevention, maintenance alerts and remote control even from your smartphone or our HelpDesk
- One **package solution** → our containers include everything needed by the compressor (cooling system, storage and electrical panel) and are very easy to install
- Originally inspired on API 618 standards for **heavy duty applications** and to work 24/7

Not only products: after sale service & remote control solutions...

- **REMOTE CONTROL** - available for both customers and CUBOGAS SERVICE department, allows to access all system data regarding the compressor status: pressure, temperature, capacity, ...
- In case of alarm, **CUBOGAS SMART** allows to remotely perform the diagnosis, optimize the system parameters and organize the service at best

...and an exclusive spare parts e-commerce for a better aftersales experience

After Sales Service

Cubogas is committed to protect your **business continuity** with **remote control**, **maintenance planning**, **B2B Platform** and a wide range of international **after sales services** up to 24/7 leveraging on our **expertise** and **technical assistance network**.

Redundant systems

Strategic spares

Remote Control

24/7 servicing option

Maintenance
planning &
management

after-sales
network

Cubogas applications

CNG online station (public and private)

CNG stations directly connected to the pipeline

CNG daughter station (public and private)

CNG stations where the NG is delivered to the stations through trailers

Self-Refill Mobile Station & Trailer (g-MRU/e-MRU)

Mobile refueling unit that can reach end user's sites to refuel vehicles

Biomethane / reverse flow

Biomethane compression following its upgrade from biogas in treatment plant

Gas gathering/ recompression solutions

Solutions to recover venting and to drain gases

LNG Boil off recovery

Cubogas package compressing natural gas coming from a LNG storage boil-off and delivering it to the pipeline

Industrial / Oil & Gas

Solutions for applications such as gas recompression in wells, powering turbines, underground storage and many others

Hydrogen

Cubogas technology for storage, distribution and application infrastructure (HRS included)

CO2

Specific solutions for carbon capture, usage and liquefaction

Cubogas: reliability and safety in gas compression

Cubogas biomethane main offering

Biomethane Compressors

Recip. Compressors Full Range

Available in different configurations, they can process up to 10.000 scmh

Range of applications:

- **gas injection** in the grid
- **virtual pipelines** and **RNG filling** of vehicles and fleets.
- **nano-liquefaction**: the key component to transform methane into liquid LNG

BMJ internal view - basic configuration

BMJ Range of products main features

- ✓ **Specifically designed for biomethane injection** up to 1000 scmh
- ✓ **Heavy duty solutions**
- ✓ **Low speed** (always below 800rpm) for maximum reliability
- ✓ Maximum **standardization and modular design** to minimize CAPEX and OPEX
- ✓ **Remote control** for predictive maintenance and quick fix of minor issues.

Main optionals and accessories:

- ✓ **2 Oil-Free solutions available:**
 - ✓ Specific filtering
 - ✓ API618 distance piece Type 2
- ✓ **Vent recovery system** for gas leakages
- ✓ **Sound-proof** option
- ✓ **Virtual pipeline configuration**
- ✓ **Dual outlet** (gas injection + virtual pipeline) – available for some configurations
- ✓ **Advanced after-sales servicing** (up to 24/7 intervention within 4 hours)
